

Save Water, Save Salt, Save Money!

Canature WaterGroup™ High-Efficiency Softeners & Filters offer a significantly higher Return-On-Investment.

Reverse Osmosis

Canature WaterGroup Commercial RO systems are affordable solutions that remove up to 99% of total dissolved solids in raw feedwater.

Can 400 800 Series

Produces up to 800 gallons per day.

WGR Reverse Osmosis System

Produces up to 1,800 gallons per day.

Can 2540 4040 Series

Produces up to 12,000 gallons per day.

Detailed Specs Delivered to your Inbox

Get all of the information you need for your project delivered to your inbox in just days.

All we need from you is:

- ◆ Estimated peak flow rate
- ◆ Estimated daily water usage
- ◆ Type of system required (softener, filter, etc.)
- ◆ The water source

Within days, we'll send you a specification package for your project that includes:

- ◆ Budgetary pricing
- ◆ Specification Language Documents
- ◆ Spec Sheets
- ◆ Drawings

The best part? You'll work directly with our team of dedicated engineers from start to finish.

Get your package today:

State-of-the-Art Commercial Water Conditioning

We Do It Differently!

- ◆ **Dedicated Team of Professional Engineers** with decades of experience
- ◆ **Precision Engineered Systems** offer Significantly Lower Operating Costs, Capital Costs and Higher Return On Investment
- ◆ **Knowledgeable Field Support Team**
- ◆ **Complete Support** from water analysis, sizing and selection right through to the start-up

High-Efficiency Technology Provides Significant Savings!

Save Water, Save Salt, Save Money!

The Canature WaterGroup™ Story

Canature WaterGroup™ is one of North America's leading manufacturers and distributors of residential and commercial water treatment solutions. Our mission is to provide **Exceptional Value** by producing **Innovative, High Quality Products** in the most efficient manner possible.

With over **Fifty Years** of industry experience, we're able to provide unparalleled industry-leading support from start to finish on every project. From water analysis and system selection and sizing to start-up support, we're with you every step of the way. Our team of knowledgeable engineers provides professional drawings and spec sheets for every job.

Our commercial water treatment systems are suited for a wide range of applications, including:

Laundromats, Car Washes, Restaurants, Hospitals, Schools, Hotels, Office Buildings, Manufacturing Facilities and Livestock Operations.

MTS Softeners

Industry Leading Responsive Flow Multi-Tank Systems (MTS)

MTS systems use **40-50% less salt and regeneration water** compared to conventional systems. During periods of **High Flow Demand** tanks come on-line to add flow rate capacity. During periods of **Low Flow Demand** tanks go off-line ensuring **Optimal Efficiency and Water Quality**.

- Benefits of an MTS System:**
- ◆ Lower Capital Cost
 - ◆ Lower Operating Costs
 - ◆ Increased System Efficiency
 - ◆ Consistent, High Quality Water
 - ◆ Ease of Service

Low Flow Rate Requirement

High Flow Rate Requirement

We offer a complete line of efficient, high quality commercial water softener systems.

95MTS Series Softeners

The 95MTS softeners can soften **up to 308 gpm***. Flow rates of up to **44 gpm** per tank and the ability to control up to 8 softeners from a single controller.

*Based on one tank being off-line at all times.

105MTS Series Softeners

The 105MTS softeners can soften **up to 462 gpm***. Flow rates of up to **66 gpm** per tank and the ability to control up to 8 softeners from a single controller.

FHF Series Softeners

FHF Series softeners provide **up to 885 gpm** of soft water (based on a quadplex system with one tank off-line at all times).

Available as a Multi-Tank System.

Multi-Valve System (MVS) Series Softeners

MVS Series softeners provide **up to 885 gpm** of soft water (based on a quadplex system with one tank off-line at all times).

Available as a Multi-Tank System.

STS Softeners

Single Tank Systems

85TA 1" Series Softeners

Provides **up to 16.6 gpm** of continuous soft water operating as a twin alternating system.

95STS Series Softeners

Provides **up to 44 gpm** of soft water.

105STS Series Softeners

Provides **up to 66 gpm** of soft water.

STS & MTS Filters

Our filters offer a variety of media options to meet your needs including carbon, birm, greensand, chem free, neutralizing, nextsand and more...

95STS Series Filters

Flow rates **up to 17 gpm**, depending on your media choice. The 95STS is perfect for small to medium sized commercial projects that don't require continuously filtered water.

105STS Series Filters

Flow rates **up to 48 gpm**. The 105STS is ideal for small to medium sized commercial applications that need higher flow rates than the 95STS offers.

95MTS Filter System

The 95MTS filters can filter **up to 272 gpm**. Flow rates of **up to 17 gpm** per tank and the ability to control up to 16 filters from a single controller.

105MTS Filter System

The 105MTS filters can filter **up to 768 gpm**. Flow rates of **up to 48 gpm** per tank and the ability to control up to 16 filters from a single controller.

Multi-Valve System (MVS) Series Filters

Flow rates **up to 864 gpm**, based on a quadplex system and depending on your application and media choice. Ideal for commercial projects that require a large volume of filtered water.

Available as a Multi-Tank System.
